ROLL NO : 25B25A4616
BRANCH :CSE-Cybersecurity
DATE :03-12-25

In Session-1

I got an overview of the important topics we will learn in Mathematics and Statistics. I understood basic ideas from linear algebra like matrices, and saw how they work through simple code examples.

Also some basic idea of numpy modules in python and its usage over mathematical equations

- dot(), add() and some more methods in numpy

We also learned introductory concepts of probability and statistics which help in understanding data. Overall, the session clearly explained what we will study in the coming weeks and why these mathematical concepts are useful

feedback : the mentoring is good and even better if use of I face some video transmission issue which leads to **Ambiguity**
